

THE FUTURE-READY PROFESSIONAL

READY FOR FUTURE OPPORTUNITIES IN THE PRIVATE SECTOR?

As you near the end of your doctorate, it's **time to think about your next steps**. The job market is evolving, and so are the skills needed to succeed.

Academic excellence alone no longer guarantees success. With AI handling many technical tasks, your **people skills will set you apart**. Skills like effective communication, creative negotiation, and business development are essential but often overlooked in academia.

Our training program provide **the practical tools and mindsets** needed to bridge this gap, preparing you to transition smoothly into the private sector and stand out in today's competitive job market.

THE APPROACH: LEARNING BY DOING

This application training is designed to be true to life. From day one, we emphasize the importance of building a network before you need it, starting with creating a strong presence, making good first impression, clarifying your goals, reviewing CV's and coverletters, mock job interviews, navigating conversations and follow up.

Just like in a timeline, participants will learn to recognize which phase they're in, what the next step is, how to prepare for it, and how to stay resilient—since resilience is one of the key soft skills that will ensure long-term success.
